WHO WE SERVE

- Are you struggling to meet deadlines or meet your academic and career goals? Would you like to learn strategies to improve your focus and productivity?
- Are you a student with a documented learning difference? Do you think you may have a learning difference?
- Are you interested in understanding your personal learning strengths?
- Do you want to learn more about productivity tools and technology?

If the answer to any of the above questions is **YES**, we can help!

WHAT WE DO FOR STUDENTS

- **Consultation & Screening**: determine indicators that distinguish academic challenges and provide ongoing consultation on navigating school and work
- **Lifespan Strategies**: 1-on-1 ongoing training in learning and workplace techniques, such as reading comprehension, test-taking, graduate work, time management, and project deadlines
- **One on One Academic Tutoring**: offer individualized class-specific tutoring by a tutor trained to work with students with learner variability
- **Technology Evaluation & Training**: determine productivity tools based on the individual’s learning profile and train for maximum efficacy in the classroom and workplace
- **Personal Learning Profile and Portfolio**: offer a summary of individual learning strengths and recommended services, self-reflection
- **Remote workshops**: join us for weekly productivity workshops and group learning strategy sessions
- **Alumni and Peer Engagement**: build community, and share experiences and advice with current SLC as mentors and expert panelists

During Covid-19, the SLC is available remotely for all services

WHY NOW?

The Schwab Learning Center is about teaching for the lifespan. We understand that our approach to working with students with learning differences must provide a foundation for negotiating the complexities of the adult world. We find innovative ways to prepare students for the rest of their lives, using the Universal Design for Learning framework.

Our key value statements are:
- Shifting the paradigm of disability to a strengths-based model of learner variability, through education, innovation, and outcomes
- Teaching students to leverage their gifts and talents through self-awareness and efficacy based practice
- Designing innovative services, tools, and programs to prepare students with learning diversity to live meaningfully across the lifespan

All of our work is designed for success in learning environments, careers, and life.

Preparation for the Lifespan
